- Full-stack development
- Mentorship & team support

ACHIEVEMENTS

Google Cloud Professional Data Engineer

Remote
May 2024

PROJECTS

@chanbzz/my-style

A minimal SCSS module for portfolio projects with dark/light mode and scroll direction helpers

Remote
July 2022

WORK EXPERIENCE

Indeed

Software Engineer II

Remote

Feb 2022 - Aug 2025

- Designed and shipped onboarding flows and job seeker features using React, TypeScript, GraphQL (Apollo), and Java
- Co-developed GraphQL APIs and integrated AWS Lambda for scalable services
- Collaborated cross-functionally with design, product, and infra teams to align feature delivery and system architecture
- Led observability reviews and implemented Datadog monitoring to improve system health and track KPIs/SLOs
- Mentored junior engineers through pairing, async support, and weekly demos
- Led accessibility efforts, resolving 30+ bugs to improve UX inclusivity
- Created developer tooling docs, reducing onboarding time by 25%
- Maintained CI/CD and dev environments using Docker, Kubernetes, GitLab, Vite, and pnpm
- Coordinated on cross-team API deprecations to streamline platform-wide experience
- Led agile ceremonies including sprint planning, stand-ups, and retrospectives
- Built and shipped a winning internal hackathon project that boosted internal tooling efficiency

Key Technologies:

React | TypeScript | JavaScript | GraphQL | Java | Spring Boot | Python | AWS | Docker | Kubernetes | GitLab CI/CD | Datadog | Kafka | Spark | Terraform | REST APIs | Jira

Curology

Software Engineering Intern

Remote

Sep 2021 - Feb 2022

- Built full-stack features in PHP (Laravel) with the Growth & Subscriptions teams
- Practiced CI/CD and Agile methodologies in a high-paced Series D startup
- Onboarded quickly to monolithic codebase; contributed to patient, provider, pharmacy, and fulfillment flows
- Completed 50+ high-urgency bug fix tickets for the G & S strike team

Key Technologies:

PHP/Laravel | React | Typescript | SQL | MySQL | MongoDB | SCSS | HTML | Soy | Github
